

Is a degree in **Interdisciplinary Studies** right for me?

I want to advance my **Career**

35%

It's estimated that by 2020, 35% of all job openings will require a bachelor's degree.

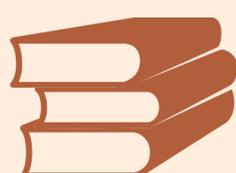

Employers value adaptable workers with competence in critical thinking, problem solving, and communication.

A degree can be used as a pathway to promotion or to enter a new job or sector.

I want to bolster my **Knowledge**

A bachelor's degree can be your first step in pursuing a master's degree, from an MBA to diplomacy.

An interdisciplinary approach can lead to a non-traditional perspective with innovative solutions.

Individuals who complete a degree display a high level of commitment to their personal and professional improvement.

I want to improve my **Skills**

Improve your ability to clearly communicate your ideas by developing critical thinking and writing skills.

Learn to develop innovative solutions to problems through research and information analysis.

Explore different methods of acquiring, analyzing, and applying knowledge across major academic disciplines.

Degree Outcomes

Doing well in your job isn't just about what you know; it's also about how you think. Being able to research and analyze information, develop innovative solutions to problems, and clearly communicate your ideas are all necessary skills for professional success—no matter the field.

NORWICH UNIVERSITY
Online

Norwich University's online Bachelor of Interdisciplinary Studies program focuses on developing these essential skills while enabling students to customize their degree track based on their current or desired job. The program is intended for working adults with professional experience but need a bachelor's degree to advance their careers.

Through relevant academic programs, engaged faculty, and personalized support, Norwich's College of Graduate and Continuing Studies provides a learning environment that empowers students to effect positive change in their personal lives, work lives, and the communities where they live.
