ACCLAIMED
ONLINE PROGRAMS
for Working Adults and Lifelong Learners

Log in to a Distinguished Tradition.
Since 1819
The Norwich Advantage

- Small classes enable in-depth discussions and frequent one-on-one interactions with professors and fellow students.
- Your learning community will become an invaluable network. When students enroll at Norwich, they not only gain access to a dynamic learning community but also to an extensive career network of successful alumni from around the globe.
- Through our flexible online platform, you can access program content and contribute to class discussions on your own schedule and at your own pace each week.
- Our interactive online platform and small class sizes mean that you’ll get to know your professors not only as educators but also as mentors, collaborators, and career guides.
- Learn from superb teacher-practitioners who have broad industry and research experience that informs and enriches their teaching, providing students with real-world insight and a context for applying their expanded skills and knowledge.
- You will have access to our library’s 100 online databases, 54,000 full-text electronic journals, and hundreds of thousands of e-books.
- You will learn to analyze and synthesize complex information and to compose clear, supportable arguments - skills relevant to a variety of fields including business, law, teaching, government, and the military.
- Norwich has been an educational pioneer since 1819 – as the nation’s first private military college, the nation’s first private college to offer civil engineering instruction, and the birthplace of ROTC.

Choose from 9 master’s programs, 2 bachelor’s completion programs and 2 graduate certificates:

**Master of Arts in Diplomacy:**
*Problem-Solving on an International Scale*

The Diplomacy program prepares students for a wide range of meaningful careers in international relations and related fields. Our program attracts passionate students from diverse professional backgrounds including the military, law enforcement, government, business, journalism, and the nonprofit sector. Our curriculum explores international relations from a macro and micro perspective, beginning with a foundational examination of the political, cultural, and geographical complexity of the international environment. Students then develop focused knowledge in one of three concentrations: international terrorism, international conflict management, or international commerce.

**Master of Arts in History:**
*Lifelong Lessons from the Past*

For nearly two centuries, Norwich University has played a vital role in history as the first private military college, birthplace of ROTC and more. Our program builds on our rich institutional history through analyzing the major developments, events, and figures of the past. Through this analysis, students cultivate a historiographical point of view that takes into account differing schools of historical thought, various research methods, and the limitations inherent in chronicling history. Our program is designed for both working professionals who want to advance or change their careers as well as motivated lifelong learners. Choose from one of two tracks: World History or American History.

**Master of Arts in Military History:**
*Our Tradition. Our Expertise.*

The Master of Arts in Military History program reflects, honors, and extends Norwich’s proud military heritage. Attracting highly motivated and passionate students from across the country, our rigorous military history graduate program provides an in-depth exploration of the role of the military and war throughout history. Informed by the American Historical Society’s guidelines for master’s programs in history, our curriculum teaches students to navigate differing historical interpretations, synthesize diverse types of historical knowledge, and develop strong analytical abilities through intensive research and writing assignments.

**Master of Business Administration:**
*Broad Relevance. Unbounded Opportunity.*

The MBA program equips working adults with the specialized skills and knowledge needed to transition to a career in the business arena or advance into a leadership role within their organizations. Rooted in theory and practice, our online MBA curriculum gives students a comprehensive foundation in core business areas as well as opportunities to apply that core knowledge to case studies and projects geared toward their workplaces and other organizations. Students can pursue a general MBA or focus their studies on one of three concentrations in project management, organizational leadership, or finance.

**Master of Civil Engineering:**
*Leadership in the Field*

As the first private college in the U.S. to teach civil engineering, Norwich has long been committed to the advancement and application of civil engineering to improve our country’s infrastructure – and the built environment as a whole. Our program honors that commitment by providing students with the knowledge and experience needed to assume leadership positions within their organizations or to run their own companies. Students tailor their online civil engineering degree by choosing one of four technical tracks in structural engineering, environmental/water resources engineering, geotechnical engineering, or construction management.
Master of Public Administration: Serving and Leading Communities

The public administration program helps working professionals gain the knowledge and skills needed to not only help advance their careers but also make a greater difference in the communities they serve. Our curriculum provides students with a broad foundation in areas such as organizational leadership and change, strategic planning, ethics, and financial management as well as the opportunity to focus their studies on one of the following six concentrations: public works administration, criminal justice, leadership, organizational leadership, and public organization fiscal management.

Master of Science in Information Security & Assurance: Network and Building Business Strategies

The information security and assurance program helps working adults in the IT field develop the business acumen and management skills needed to pursue leadership positions. Our curriculum explores the technical theories and methods behind information security and assurance, best practices in information security technology, organizational structure and policy development, the regulatory environment, and management strategies. Key skills fostered throughout the program include written communications, critical analysis, problem solving, project management, and leadership. Norwich is designated a Center of Academic Excellence in Information Assurance Education by the National Security Agency and Department of Homeland Security.

Master of Science in Leadership: From Leading to Inspiring

The leadership program helps aspiring and rising leaders from a broad range of professional settings hone their personal leadership styles and develop the specialized knowledge and skills needed to not just manage but inspire positive change within their organizations. Integrating leadership theory, analysis, and practice, our program curriculum provides students with a multidisciplinary framework for understanding their leadership skills as well as various opportunities to practice them. Students examine key concepts such as organizational behavior, human capital management, strategic communication, change management, and emotional intelligence through case studies and workplace-based projects.

Master of Science in Nursing: Thought Leaders with the Skills to Lead

Accredited by the Commission on Collegiate Nursing Education (CCNE), our online masters in nursing program equips working nurses with the relevant knowledge, skills, and experience needed to assume leadership positions. Through a series of core courses, students develop a broad-based knowledge of health systems and essential skills in critical thinking, problem solving, research, evidence-based practice, communications, and management. Students then pursue one of two tracks in nursing administration or nursing education depending on their career goals.

Bachelor of Science in Criminal Justice: Leading and Protecting the Public

The online Bachelor of Science in Criminal Justice degree completion program is designed for individuals striving to become leaders in law enforcement, intelligence, and security management. With two concentrations to choose from – Public Safety and Law Enforcement, and Intelligence and Security Management – our program can help working professionals advance a current career or transition into a new civilian or military career. Integrating the students’ real world experiences with the theories behind standard law enforcement and security practices, our curriculum builds the knowledge and skills needed to help students impact their future and excel in their career.

Bachelor of Science in Strategic Studies and Defense Analysis From the Field to the Classroom

Our bachelor’s degree completion program provides members of the U.S. Special Operations Forces (SOF) with the unique opportunity to earn a degree that reflects and builds on their military education and experience. Taught by experienced faculty, many who have served in the military, the curriculum addresses specific strategies and objectives of the SOF, and puts the students’ knowledge into practice through research and analysis relating to regional threat environments and conflict areas. Specially designed for active duty, retired, and reserve military personnel assigned to USSOCOM and its subordinate and sub-unified commands, our program helps students build a foundation of skills and knowledge that can be used to advance within the military or transition to another career.

Teaching and Learning Certificate: A Stepping Stone to Higher Education

The Teaching and Learning Certificate program is designed to equip professionals who already have subject matter expertise within their academic discipline with the knowledge, skills, and credentials they need to teach at the post-secondary level. Key curriculum objectives include learning how to craft educational experiences for diverse learners, create effective assignments and classroom materials, and develop and sustain a vibrant learning community.
